## Comments

- “Thank you for your help at office hours! It would be nice if more partial credit was granted though, since much of the work was computational, and minor errors can result in incorrect numerical answers even if the process is as a whole correct.” (Ec 122: Econometrics, FA 2018-19)
- “I never managed to make it to Sumit’s office hours, but he was always willing to help me via email and always gave very helpful answers.” (Ec 122: Econometrics, FA 2019-20)
- “Sumit was a fantastic help. Most of the time, I had small questions on the homework (typically clarifications, due to the varying conventions one may use in the financial world for various topics), and Sumit always addressed all of my concerns thoroughly and in a timely manner. And he didn’t mind doing so via email, which I appreciated immensely since I live rather far from campus and can’t always make it to office hours.” (BEM 103: Introduction to Finance, WI 2019-20)
